

SAVE WATER. SECURE THE FUTURE!

WATER CONSERVATION

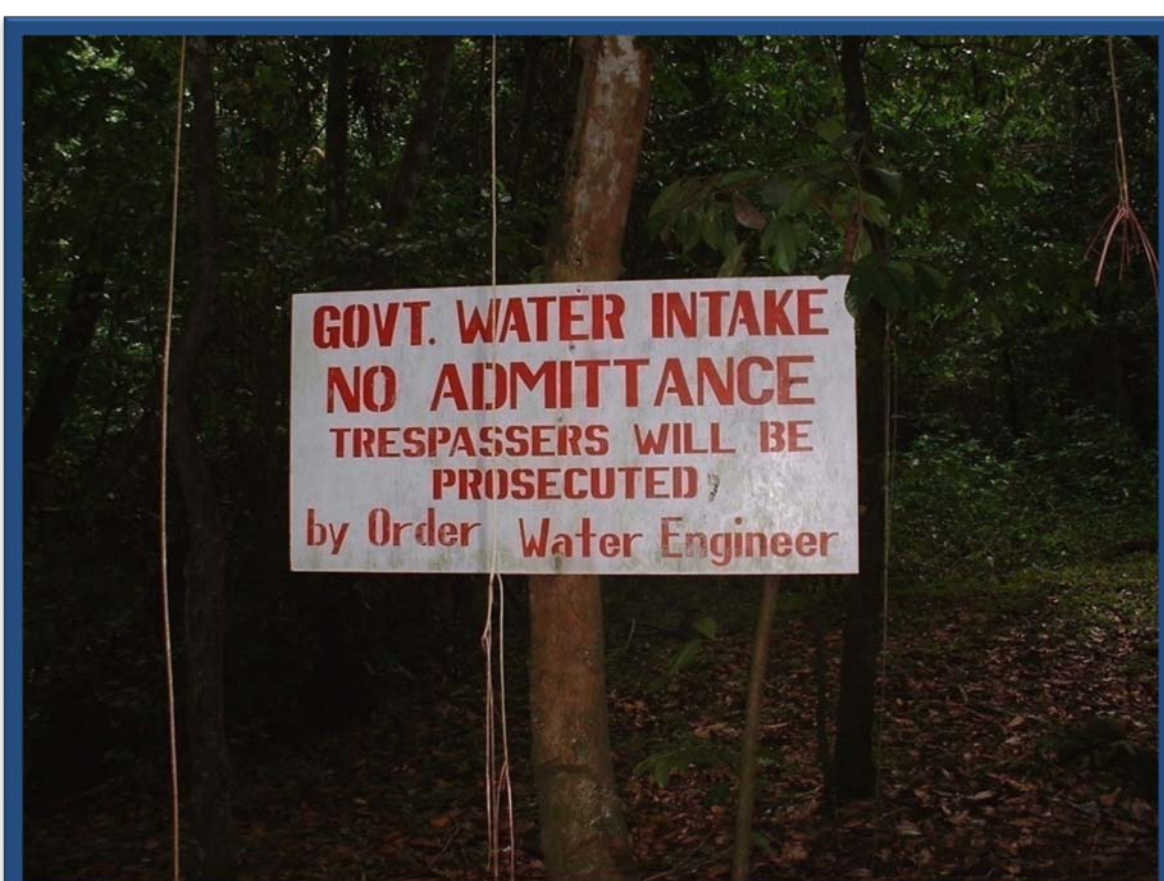

- Check for leaky faucets and toilets
- Water plants in the early morning or late afternoon
- Keep showers shorter than 5 min.
- Use a broom to clean your driveway or garage instead of water
- Use water efficient appliances especially toilets
- Collect rainwater to help augment your domestic water needs

WE ARE THE SOLUTION TO WATER POLLUTION!

- Do not dump toxic materials into the drain
- Carefully apply fertilizers and pesticides to your plants and lawn – follow manufacturers instructions closely
- Maintain your septic tank regularly (pump out every 3-5 years)
- Dispose of waste from livestock or pets properly
